

# CONTENTS

Preface .....	VII
1. Chemical composition and systemic organisation of living matter .....	1
1.1. Chemical composition of living matter.....	2
1.1.1. Bioelements .....	3
1.1.2. Biomolecules .....	4
1.1.2.1. Organic biomolecules .....	5
1.1.2.2. Inorganic biomolecules.....	5
1.1.2.3. Types of bindings specific for biomolecules .....	7
1.2. Systemic organisation of living matter .....	8
1.2.1. Levels of organisation in biologic systems – hierarchical aspects.....	8
1.2.2. Characteristics of acellular living matter – viruses .....	10
1.2.3. Characteristics of cellular living matter .....	12
1.2.3.1. Prokaryotic cell .....	13
1.2.3.2. Eukaryotic cell .....	15
2. Carbohydrates.....	19
2.1. General considerations .....	19
2.2. Chemical constitution .....	19
2.3. Classification of carbohydrates .....	20
2.4. Oses .....	21
2.4.1. Structure and isomery of carbohydrates.....	21
2.4.2. Nomenclature of monosaccharides .....	23
2.4.3. Physical properties .....	23
2.4.4. Chemical properties.....	24
2.4.4.1. Reactions specific for the carbonyl group .....	24
2.4.4.2. Reactions of the –OH glycosidic group.....	25
2.4.4.3. Reactions of the –OH alcoholic group.....	26
2.4.4.4. Reaction of internal anhydrification .....	26
2.4.4.5. Reaction of anhydrification and cycling .....	27
2.4.5. Representatives of monosaccharides.....	27
2.4.5.1. Dioses .....	27
2.4.5.2. Trioses .....	27
2.4.5.3. Tetroses .....	27
2.4.5.4. Pentoses.....	27
2.4.5.5. Hexoses .....	28
2.4.6. Derivatives of monosaccharides.....	29
2.4.6.1. Deoxisaccharides .....	29
2.4.6.2. Aminosaccharides .....	29
2.4.6.3. Uronic acids .....	29
2.4.6.4. Derivatives with sulphur .....	30

2.4.6.5. Cyclanols.....	30
2.5. Osides .....	30
2.5.1. Holosides .....	30
2.5.1.1. Oligoholosides .....	30
2.5.1.2. Polyholosides .....	34
2.5.1.3. Polyolosides with glycan structure .....	36
2.5.1.4. Polyholosides with glycosaminoglycan structure...	44
2.5.2. Heterosides .....	47
2.6. Glycoproteins .....	49
2.7. Glycolipids .....	50
3. Lipids.....	51
3.1. General considerations .....	51
3.2. Chemical constitution .....	51
3.3. Classification of lipids.....	52
3.4. Structural precursors of lipids .....	53
3.4.1. Fatty acids.....	53
3.4.1.1. Physical properties .....	60
3.4.1.2. Chemical properties .....	61
3.4.2. Hydroxylic compounds .....	62
3.4.2.1. Glycerol.....	63
3.4.2.2. Inositol .....	63
3.4.2.3. Superior aliphatic monoalcohols .....	64
3.4.2.4. Sterols.....	4
3.4.2.5. Aminoalcohols .....	68
3.4.3. Phosphoric acid .....	68
3.5. Simple lipids.....	68
3.5.1. Steroid compounds .....	72
3.5.2. Sterides .....	73
3.5.3. Calcipherols.....	74
3.5.4. Sterolic heterosides.....	75
3.5.5. Cerides .....	75
3.5.6. Etolides .....	77
3.6. Complex lipids .....	77
3.6.1. Glycerophospholipids.....	78
3.6.2. Sphyngolipids .....	81
3.7. Lipoproteins .....	84
3.8. Glycolipids .....	85
4. Protids.....	87
4.1. General considerations .....	87
4.2. Chemical constitution .....	88
4.3. Classification of protids .....	88
4.4. Aminoacids .....	89
4.4.1. Natural state – generalities .....	91

4.4.2. Physical properties .....	91
4.4.3. Physico-chemical properties .....	92
4.4.4. Chemical properties.....	93
4.4.5. Proteinogenous amino acids.....	98
4.4.5.1. Acyclic aminoacids.....	98
4.4.5.2. Homocyclic aminoacids.....	99
4.4.5.3. Heterocyclic aminoacids.....	99
4.4.5.4. Heterocyclic iminoacids.....	100
4.4.6. Non-proteinogenous aminoacids.....	100
4.5. Peptids .....	101
4.5.1. Physical properties .....	102
4.5.2. Chemical properties.....	103
4.5.3. Natural peptids .....	104
4.6. Protids.....	108
4.6.1. Levels of structural organisation.....	110
4.6.2. Properties of peptides .....	115
4.7. Simple protids .....	118
4.7.1. Globular holoprotids.....	119
4.7.2. Fibrilar holoprotids.....	122
4.7.3. Muscular holoprotids.....	123
4.7.4. Insoluble fibrilar holoprotids.....	124
4.8. Complex protids .....	125
4.8.1. Glycoprotids .....	126
4.8.2. Lipoprotids .....	130
4.8.3. Metalloprotids .....	132
4.8.4. Phosphoprotids .....	133
4.8.5. Chromoprotids.....	134
4.8.6. Nucleoprotids .....	140
4.8.7. Nucleic acids .....	141
4.8.7.1. Structural precursors .....	145
4.8.7.2. Deoxyribonucleic acids.....	146
4.8.7.3. Types of deoxyribonucleic acids .....	149
4.8.7.3.1. DNA with dextrorotation .....	150
4.8.7.3.2. DNA with senestrorotation .....	151
4.8.7.4. Ribonucleic acids .....	152
4.8.7.5. Types of ribonucleic acids .....	153
5. Water and mineral compounds.....	155
5.1. General considerations .....	155
5.2. Water – constituent of living matter .....	156
5.2.1. Chemical structure of water .....	158
5.2.2. Physico-chemical properties .....	161
5.2.3. Colligative properties .....	163
5.3. Mineral compounds.....	165

5.3.1. General considerations .....	165
5.3.2. Mineral compounds with cationic character .....	166
5.3.2.1. Macroelements and oligoelements with cationic character .....	166
5.3.2.2. Microelements with cationic character .....	168
5.3.3. Mineral compounds with anionic character .....	171
5.3.3.1. Macroelements and oligoelements with anionic character .....	171
5.3.3.2. Microelements with anionic character .....	173
5.4. Investigation of mineral compounds.....	175
References (selectiv) .....	177
