PART I. BASIS OF BIOCHEMISTRY AND XENOBIOCHEMISTRY	1
1. MOLECULAR BASIS OF BIODIVERSITY – CONTRIBUTION OF BIOCHEMISTRY AND XENOBIOCHEMISTRY	3
1.1. General considerations	3
1.2. Biochemical basis of biodiversity - bioconstituents and trophicity	4
1.2.1. Synoptic view	4
1.2.2. Bioconstituents.....	5
1.2.2.1. Bioelements	5
1.2.2.2. Biomolecules	6
1.2.3. Trophicity	9
1.2.3.1. Autotrophic organisms	9
1.2.3.2. Heterotrophic organisms	10
1.3. Types of biodiversity	11
1.4. Genetic biodiversity – nucleic acids	12
1.5. Biodiversity in the acceptance of agrosciences	15
1.5.1. Peculiarities of agrobiodiversity	15
1.5.2. Applicative specificity in agrosciences and food science	17
1.6. Preservation and variations of biodiversity	21
1.6.1. Preservation of biodiversity	21
1.6.1.1. In situ preservation	21
1.6.1.2. Ex situ preservation	21
1.6.2. Variations of biodiversity	21
1.6.2.1. Natural variations	21
1.6.2.2. Artificial variations.....	22
1.7. Xenobiochemical basis of biodiversity	22
1.8. Specific interactions of xenobiotics	23
1.9. Reduction of the chemical xenobiotics quantum in foods.....	26
1.10. Bioconstituents-xenobiotics relationship	30
References (selective)	32
2. XENOBIOCHEMISTRY FROM HISTORY TO PRESENT	35
2.1. General considerations	35
2.2. Object. Interdisciplinarity. History	36
2.2.1. Object and divisions of xenobiochemistry.....	36
2.2.2. Interdisciplinary connections of xenobiochemistry	37
2.2.3. Brief history of xenobiochemistry	39
2.3. Acces of chemical xenobiotics into the organism	48
2.3.1. Synoptic view.....	48
2.3.2. Gastrointestinal route	48
2.3.3. Pulmonary route.....	50

2.3.4. Cutaneous route	50
2.4. Biochemical homeostasis and xenobiotics	52
2.4.1. Synoptic view.....	52
2.4.2. The problem of adaptability.....	53
2.5. Biotransformation and the bioconstituents – xenobiotics relationship.....	55
2.6. Xenobiochemistry and its subsequent domains	57
2.6.1. Concentration – response relationship	57
2.6.2. Interdisciplinary connective aspects	59
2.7. Evaluation of the action of xenobiotics – Principles	60
References (selective).....	63
3. BIOCHEMISTRY AND XENOBIOCHEMISTRY: CONCEPTS, APPLICATIONS	65
3.1. General considerations	65
3.2. Concept of metabolization in connection with nutrients	68
3.2.1. Synoptic view.....	68
3.2.2. Specificity of nutrients' composition.....	69
3.2.3. Phases and pathways of metabolisation	72
3.2.3.1. Phases of metabolisation	72
3.2.3.2. Pathways of metabolisation	72
3.2.4. Metabolic turnover.....	73
3.3. Concept of biotransformation in connexion with xenobiotics	75
3.3.1. Synoptic view.....	75
3.3.2. Phases and pathways of biotransformation.....	76
3.3.2.1. Phases of biotransformation	76
3.3.2.2. Pathways of biotransformation.....	78
3.4. Specificity of the metabolites-nutrients-chemical xenobiotics relationship.....	82
3.5. Testing of xenobiotics. General principles	85
3.6. Biomarkers in the investigation of xenobiotics	88
3.6.1. Synoptic view	88
3.6.2. Types of biomarkers	88
3.6.3. Applications of biomarkers.....	89
References (selective).....	91
4. ANATOMO-PHYSIOLOGICAL ASPECTS REGARDING METABOLISATION AND BIOTRANSFORMATION	95
4.1. General considerations	95
4.2. Apparata and systems	96
4.3. Digestive apparatus	97
4.3.1. Segments of digestive tract	98
4.3.1.1. Oral cavity	98
4.3.1.1.1. Delimitation, connections	98
4.3.1.1.2. Tongue	100
4.3.1.1.3. Annexes of oral cavity	100
4.3.1.2. Pharynx	102
4.3.1.3. Esophagus	103
4.3.1.4. Stomach	104
4.3.1.5. Small intestine.....	104
4.3.1.5.1. Duodenum	104
4.3.1.5.2. Jejunum	105
4.3.1.5.3. Ileum.....	105

CONTENTS

4.3.1.6. Large intestine	105
4.3.1.6.1. Cecum	105
4.3.1.6.2. Colon	106
4.3.1.6.3. Rectum	106
4.3.2. Annexe glands of digestive tract	107
4.3.2.1. Pancreas	107
4.3.2.2. Liver	108
4.4. Physiology of digestion and absorption	109
4.4.1. Digestion	109
4.4.1.1. Oro-pharyngo-esophagian phase	110
4.4.1.1.1. Insalivation	110
4.4.1.1.2. Chewing	112
4.4.1.1.3. Swallowing	112
4.4.1.2. Gastric phase	113
4.4.1.2.1. Action of gastric secretion	113
4.4.1.2.2. Effect of gastric motricity	114
4.4.1.3. Intestinal phase	114
4.4.1.3.1. Action of pancreatic secretion	115
4.4.1.3.2. Action of bile secretion	116
4.4.1.3.3. Action of intestinal secretion	117
4.4.2. Absorption in the digestive tract	117
4.4.2.1. Absorption of nutrients	118
4.4.2.2. Absorption of xenobiotics	120
References (selective)	121

5. BIOCHEMICAL BARRIERS, BIOAVAILABILITY AND PATOBIOCHEMICAL IMPLICATIONS

5.1. General considerations	123
5.2. Tissular barriers of the organism	124
5.2.1. Gastrointestinal barrier	124
5.2.2. Haemato-tissular barriers	125
5.2.2.1. Haemato-encephalic barrier	125
5.2.2.1.1. Blood-brain type barrier	125
5.2.2.1.2. Blood-cerebrospinal fluid type barrier	126
5.2.2.2. Haemato-placental barrier	126
5.2.2.3. Hematological barrier of capillary vessels	129
5.2.3. Pulmonary barrier	130
5.2.4. Olfactory barrier	130
5.2.5. Skin barrier	131
5.3. Membranar barriers of cells	132
5.3.1. Microtransport systems	132
5.3.1.1. Passive transmembrane transport	132
5.3.1.1.1. Diffusion	132
5.3.1.1.2. Osmosis	135
5.3.1.1.3. Transport conditioned by Donnan equilibrium	136
5.3.1.2. Active transmembrane transport	137
5.3.1.2.1. Transport against the concentration gradient	137
5.3.1.2.2. Transport by group translocation	137
5.3.2. Macrotransport systems	138
5.3.2.1. Endocytosis	139
5.3.2.2. Exocytosis	139

CONTENTS

6.3.3. Biological activity	180
6.3.4. Environmental distribution	190
6.4. Mycotoxins	191
6.4.1. Synoptic view.....	191
6.4.2. Chemical structure	192
6.4.3. Biological activity	196
6.4.4. Environmental distribution	199
6.5. Steroid compounds	202
6.5.1. Synoptic view.....	202
6.5.2. Chemical structure	203
6.5.2.1. Steroids with non-hormonal activity	204
6.5.2.2. Steroids with hormonal activity.....	207
6.5.3. Biological activity	209
6.5.4. Environmental distribution	213
6.6. Nitroso derivatives.....	214
6.6.1. Synoptic view.....	214
6.6.2. Chemical structure	214
6.6.3. Biological activity	217
6.6.4. Environmental distribution	220
6.7. Antibiotics	220
6.7.1. Synoptic view.....	220
6.7.2. Chemical structure	222
6.7.2.1. Obtainment of antibiotics - general aspects	222
6.7.2.2. Groups of antibiotics: synopsis	223
6.7.2.2.1. Beta-lactames	223
6.7.2.2.2. Aminoglycosides	224
6.7.2.2.3. Chloromicetines and derivatives	224
6.7.2.2.4. Tetracyclines	224
6.7.2.2.5. Macrolides, Lincosamides, Streptogramines (M-L-S).....	224
6.7.2.2.6. Rifamicines.....	225
6.7.2.2.7. Polypeptidic antibiotics	225
6.7.2.2.8. Sulphamides	225
6.7.2.2.9. Chinolone and chinolonic derivatives	225
6.7.2.2.10. Nitrofurans	225
6.7.2.2.11. Nitroimidazoles	226
6.7.2.2.12. Glycopeptides.....	226
6.7.3. Biological activity	226
6.7.4. Environmental distribution	226
6.8. Food-native xenobiotics	230
6.8.1. Food-native xenobiotics of vegetal origin	230
6.8.1.1. Alkaloids.....	230
6.8.1.2. Allergens.....	231
6.8.1.3. Cyanogenesis glycosides.....	231
6.8.1.4. Phytoestrogens.....	233
6.8.1.5. Proteins	233
6.8.1.6. Lipids	236
6.8.1.7. Antivitamins	236
6.8.1.8. Oxalates and phytates	237
6.8.2. Food-native xenobiotics of animal origin	238
6.8.2.1. Xenobiotics originating from domestic animals.....	239

6.8.2.2. Xenobiotics originating from marine animals	239
6.9. Organic chemical xenobiotics found in foods	240
6.9.1. Synoptic view	240
6.9.2. Organic xenobiotics in vegetal source foods	240
6.9.2.1. Organic xenobiotics in grains	240
6.9.2.2. Organic xenobiotics in vegetables	241
6.9.2.3. Organic xenobiotics in fruits	242
6.9.3. Organic xenobiotics in animal source foods	242
6.9.3.1. Organic xenobiotics in milk and milk products	242
6.9.3.2. Organic xenobiotics in meat and fish	243
6.9.3.3. Organic xenobiotics in eggs	245
6.9.3.4. Organic xenobiotics in honey	245
6.9.4. Organic xenobiotics in processed foods	245
6.9.4.1. Organic xenobiotics in sweets	245
6.9.4.2. Organic xenobiotics in fats	246
6.9.4.3. Organic xenobiotics in beverages	247
6.9.4.4. Organic xenobiotics in spices	247
References (selective)	247
7. XENOBIOCHEMISTRY OF ENVIRONMENTAL INORGANIC CHEMICAL POLLUTANTS	253
7.1. General considerations	253
7.2. Nitrates and nitrites	254
7.2.1. Synoptic view	254
7.2.2. Chemical structure	254
7.2.3. Biological activity	255
7.2.4. Environmental distribution	256
7.3. Xenobiotic mineral compounds	261
7.3.1. Synoptic view	261
7.3.2. Xenobiotic mineral compounds of cationic type	262
7.3.3. Xenobiotic mineral compounds of anionic type	269
7.3.4. Environmental distribution	271
7.4. Inorganic chemical xenobiotics found in foods	273
7.4.1. Synoptic view	273
7.4.2. Inorganic xenobiotics in vegetal source foods	273
7.4.2.1. Inorganic xenobiotics in grains	273
7.4.2.2. Inorganic xenobiotics in vegetables	273
7.4.2.3. Inorganic xenobiotics in fruits	274
7.4.3. Inorganic xenobiotics in animal source foods	274
7.4.3.1. Inorganic xenobiotics in milk and milk products	274
7.4.3.2. Inorganic xenobiotics in meat and fish	274
7.4.3.3. Inorganic xenobiotics in eggs	275
7.4.3.4. Inorganic xenobiotics in honey	275
7.4.4. Inorganic xenobiotics in processed foods	275
7.4.4.1. Inorganic xenobiotics in sweets	275
7.4.4.2. Inorganic xenobiotics in fat	275
7.4.4.3. Inorganic xenobiotics in beverages	276
7.4.4.4. Inorganic xenobiotics in spices	277
