

CONTENTS

PART I. VITAMINS AND ENZYMES	1
1. VITAMINS	3
1.1. General considerations	3
1.2. Chemical composition and natural distribution.....	7
1.2.1. Synoptic view.....	7
1.2.2. Role and characteristics	8
1.2.3. History - premises and evolutive status	10
1.2.4. Physiologic effects: deficiency and excess	13
1.2.4.1. Vitamin deficiency	13
1.2.4.2. Vitamin excess.....	16
1.3. Classification and nomenclature.....	17
1.3.1. Classes of vitamins	17
1.3.2. The notion of „vitaminic factors”	18
1.4. Provitamins and the vitaminic biogenesis	20
1.5. Antivitamins: structure-activity relationship.....	22
1.5.1. Mechanism of action.....	23
1.5.1.1. Antivitamins with structural analogy	23
1.5.1.2. Antivitamins with structural heterology	25
1.5.2. Biological and biomedical effects	26
1.6. Dietary reference values according to EFSA	27
1.7. Liposoluble vitamins	28
1.7.1. Vitamin A	28
1.7.1.1. Chemical structure.....	29
1.7.1.1.1. Vitaminic compounds	29
1.7.1.1.2. Vitaminic derivatives	30
1.7.1.1.3. Provitamins A.....	30
1.7.1.2. Biological activity.....	31
1.7.1.3. Food sources and nutritional requirement	33
1.7.1.4. Physiological effects.....	34
1.7.1.5. Antivitamins A	37
1.7.2. Vitamins D.....	38
1.7.2.1. Chemical structure.....	39
1.7.2.1.1. Vitaminic compounds	39
1.7.2.1.2. Provitamins D.....	43
1.7.2.2. Biological activity.....	43
1.7.2.3. Food sources and nutritional requirement	43
1.7.2.4. Physiological effects.....	46
1.7.2.5. Antivitamins D	50
1.7.3. Vitamins E	51
1.7.3.1. Chemical structure.....	51
1.7.3.1.1. Vitaminic compounds	52

1.7.3.1.2. Tocoferolic derivatives	54
1.7.3.1.3. Vitaminic precursors	56
1.7.3.2. Biological activity.....	56
1.7.3.3. Food sources and nutritional requirement	57
1.7.3.4. Physiological effects.....	59
1.7.3.5. Antivitamins E.....	61
1.7.4. Vitamins K.....	61
1.7.4.1. Chemical structure.....	63
1.7.4.1.1. Vitaminic compounds	63
1.7.4.1.2. Vitaminic precursors	66
1.7.4.2. Biological activity.....	67
1.7.4.3. Food sources and nutritional requirement	69
1.7.4.4. Physiological effects.....	70
1.7.4.5. Antivitamins K	72
1.8. Hydrosoluble vitamins.....	73
1.8.1. Vitamins B: vitaminic complex	73
1.8.1.1. Vitamin B ₁	76
1.8.1.1.1. Chemical structure	76
1.8.1.1.2. Biological activity	77
1.8.1.1.3. Food sources and nutritional requirement.....	78
1.8.1.1.4. Physiological effects	79
1.8.1.1.5. Antivitamins B ₁	80
1.8.1.2. Vitamin B ₂	82
1.8.1.2.1. Chemical structure	82
1.8.1.2.2. Biological activity	83
1.8.1.2.3. Food sources and nutritional requirement.....	85
1.8.1.2.4. Physiological effects	86
1.8.1.2.5. Antivitamins B ₂	87
1.8.1.3. Vitamin B ₃	88
1.8.1.3.1. Chemical structure	89
1.8.1.3.2. Biological activity	89
1.8.1.3.3. Food sources and nutritional requirement.....	91
1.8.1.3.4. Physiological effects	92
1.8.1.3.5. Antivitamins B ₃	94
1.8.1.4. Vitamin B ₅	95
1.8.1.4.1. Chemical structure	95
1.8.1.4.2. Biological activity	95
1.8.1.4.3. Food sources and nutritional requirement.....	97
1.8.1.4.4. Physiological effects	98
1.8.1.4.5. Antivitamins B ₅	99
1.8.1.5. Vitamin B ₆	99
1.8.1.5.1. Chemical structure	99
1.8.1.5.2. Biological activity	100
1.8.1.5.3. Food sources and nutritional requirement.....	101
1.8.1.5.4. Physiological effects	102
1.8.1.5.5. Antivitamins B ₆	103
1.8.1.6. Vitamin B ₇	104
1.8.1.6.1. Chemical structure	105
1.8.1.6.2. Biological activity	106
1.8.1.6.3. Food sources and nutritional requirement.....	108
1.8.1.6.4. Physiological effects	109

CONTENTS

1.8.1.6.5. Antivitamins B ₇	110
1.8.1.7. Vitamina B ₉	111
1.8.1.7.1. Chemical structure.....	111
1.8.1.7.2. Biological activity.....	112
1.8.1.7.3. Food sources and nutritional requirement.....	112
1.8.1.7.4. Physiological effects.....	114
1.8.1.7.5. Antivitamins B ₉	116
1.8.1.8. Vitamin B ₁₂	116
1.8.1.8.1. Chemical structure.....	117
1.8.1.8.2. Biological activity.....	119
1.8.1.8.3. Food sources and nutritional requirement.....	121
1.8.1.8.4. Physiological effects.....	122
1.8.1.8.5. Antivitamins B ₁₂	123
1.8.1.9. Compounds integrated occasionally in the B complex.....	124
1.8.2. Vitamin C.....	127
1.8.2.1. Chemical structure.....	128
1.8.2.2. Biological activity.....	129
1.8.2.3. Food sources and nutritional requirement.....	130
1.8.2.4. Physiological effects.....	131
1.8.2.5. Antivitamins C.....	133
1.8.3. Vitamins P.....	133
1.8.3.1. Chemical structure.....	134
1.8.3.1.1. Vitaminic compounds.....	136
1.8.3.1.2. Vitaminic precursors.....	138
1.8.3.2. Biological activity.....	138
1.8.3.3. Food sources and nutritional requirement.....	140
1.8.3.4. Physiological effects.....	141
1.8.3.5. Antivitamins P.....	142
1.9. Substances with vitaminic character.....	142
1.9.1. Essential fatty acids.....	142
1.9.1.1. Chemical structure.....	143
1.9.1.2. Biological activity.....	143
1.9.1.3. Food sources.....	145
1.9.1.4. Physiological effects.....	145
1.9.2. Lipoic acid.....	146
1.9.2.1. Chemical structure.....	147
1.9.2.2. Biological activity.....	147
1.9.2.3. Food sources.....	148
1.9.2.4. Physiological effects.....	148
1.9.3. Mesoinositol.....	149
1.9.3.1. Chemical structure.....	149
1.9.3.2. Biological activity.....	149
1.9.3.3. Food sources.....	150
1.9.3.4. Physiological effects.....	151
1.9.4. Carnitine.....	151
1.9.4.1. Chemical structure.....	152
1.9.4.2. Biological activity.....	152
1.9.4.3. Food sources.....	153
1.9.4.4. Physiological effects.....	153
1.9.5. Para-aminobenzoic acid.....	154
1.9.5.1. Chemical structure.....	154

1.9.5.2. Biological activity.....	154
1.9.5.3. Food sources	154
1.9.5.4. Physiological effects.....	155
1.9.6. Ubiquinone.....	155
1.9.6.1. Chemical structure	155
1.9.6.2. Biological activity.....	155
1.9.6.3. Food sources	156
1.9.6.4. Physiological effects.....	156
1.9.7. Coline	156
1.9.7.1. Chemical structure	156
1.9.7.2. Biological activity.....	157
1.9.7.3. Food sources	159
1.9.7.4. Physiological effects.....	159
1.10. Vitamins in food chemistry and nutrition	160
1.10.1 Overview.....	160
1.10.2. Losses of vitaminic micronutrients	163
1.10.3. Fortifying with vitaminic micronutrients.....	165
1.11. Vitamins in clinical chemistry and pathobiochemistry.....	168
1.11.1. Synoptic view.....	168
1.11.2. From pathobiochemistry to pathophysiology – general aspects	169
1.11.3. Peculiarities of dishomeostasis in vitamin deficiencies	169
1.11.3.1. Dishomeostasis of liposoluble vitamins	169
1.11.3.2. Dishomeostasis of hydrosoluble vitamins	172
References (selective)	179
2. ENZYMES.....	185
2.1. General considerations	185
2.2. Chemical composition and natural distribution.....	187
2.2.1. Synoptic view.....	187
2.2.2. Role and characteristics	187
2.2.3. History – premises and evolutive status	189
2.2.4. Enzymes in living matter	192
2.3. Classification and nomenclature.....	197
2.3.1. Synoptic view.....	197
2.3.2. Classification of enzymes	197
2.3.3. Nomenclature of enzymes.....	201
2.4. Structure of enzymes - levels of organisation	201
2.4.1. Synoptic view.....	201
2.4.2. Levels of structural organisation at enzymes.....	202
2.4.2.1. Primary structure	202
2.4.2.2. Secondary structure	202
2.4.2.3. Tertiary structure	203
2.4.2.4. Quaternary structure	204
2.4.3. Types of enzymes	204
2.4.3.1. Monoprotomer enzymes	205
2.4.3.2. Oligoprotomer enzymes.....	205
2.4.3.3. Isoenzymes.....	206
2.4.3.4. Multienzymatic systems	210
2.5. Holoenzymes and heteroenzymes: structure - activity relationship	212
2.5.1. Synoptic view.....	212
2.5.2. Holoenzymes.....	212

CONTENTS

2.5.3. Heteroenzymes.....	214
2.5.4. Catalytic centre at enzymes	215
2.5.4.1. Constitutional particularities	215
2.5.4.2. Identification methods	216
2.6. Coenzymes – structural particularities	219
2.6.1. Synoptic view.....	219
2.6.2. Coenzymes with aliphatic structure.....	220
2.6.2.1. Gluthathione	220
2.6.2.2. Ascorbic acid	222
2.6.2.3. Lipoic acid	223
2.6.3. Coenzymes with aromatic structure.....	224
2.6.3.1. Ubiquinone	224
2.6.4. Coenzymes with heterocyclic structure	225
2.6.4.1. Coenzymes of the vitamins from the B complex.....	226
2.6.4.1.1. Thiaminic coenzyme	226
2.6.4.1.2. Flavinic coenzymes	227
2.6.4.1.3. Nicotinamidic coenzymes	227
2.6.4.1.4. Pantothenic coenzyme.....	229
2.6.4.1.5. Pyridoxinic coenzyme	230
2.6.4.1.6. Biotinic coenzyme.....	231
2.6.4.1.7. Folic coenzyme	232
2.6.4.1.8. Cian-cobalaminic coenzymes.....	234
2.6.4.2. Nucleosidetriphosphate and nucleoside sulphonic coenzymes	235
2.6.4.2.1. Nucleosidetriphosphate coenzymes	235
2.6.4.2.2. Nucleosidesulphonic coenzymes.....	238
2.6.5. Enzymes with biometal coenzymes	239
2.6.5.1. Enzymes with iron	240
2.6.5.2. Enzymes with magnesium	243
2.6.5.3. Enzymes with zinc	245
2.6.5.4. Enzymes with copper.....	246
2.6.5.5. Ionic enzyme effectors.....	246
2.7. Specificity of enzymes.....	248
2.7.1. Synoptic view.....	248
2.7.2. Substrate specificity.....	249
2.7.2.1. Absolute specificity	249
2.7.2.2. Relative specificity	250
2.7.2.3. Steric specificity	251
2.7.3. Action specificity.....	252
2.7.4. Specificity - genetic attribute	254
2.7.4.1. Constitutive enzymes.....	254
2.7.4.2. Induced enzymes.....	255
2.8. Mechanism of action of enzymes: physico-chemical aspects	256
2.8.1. Synoptic view.....	256
2.8.2. Thermodynamics of enzymatic reactions	257
2.8.2.1. Internal energy and entropy	257
2.8.2.2. Free energy	258
2.8.2.3. Activation energy	259
2.8.3. Kinetics of enzymatic reactions	260
2.8.3.1. General characteristics	260
2.8.3.2. Particularities of biochemical kinetics	261
2.8.3.3. Reaction rate	262

2.8.3.4. Reaction order	262
2.8.3.5. Molecular activity.....	264
2.8.4. Factors that influence the rate of enzymatic reactions	264
2.8.4.1. Influence of enzyme concentration.....	264
2.8.4.2. Influence of substrate concentration.....	265
2.8.4.3. Influence of environmental temperature.....	268
2.8.4.4. Influence of environmental pH.....	270
2.8.4.5. Influence of enzymatic modulators	272
2.8.4.5.1. Inhibition modulators	272
2.8.4.5.2. Activation modulators	279
2.9. Classes of enzymes - specific interactions, representatives	280
2.9.1. Oxidoreductases.....	280
2.9.1.1. Synoptic view	280
2.9.1.2. Representatives	280
2.9.1.3. Specific interactions (selective).....	287
2.9.2. Transferases	287
2.9.2.1. Synoptic view	287
2.9.2.2. Representatives.....	287
2.9.2.3. Specific interactions (selective).....	294
2.9.3. Hydrolases	294
2.9.3.1. Synoptic view	294
2.9.3.2. Representatives.....	295
2.9.3.3. Specific interactions (selective).....	302
2.9.4. Liases	304
2.9.4.1. Synoptic view	304
2.9.4.2. Representatives.....	304
2.9.4.3. Specific interactions (selective).....	307
2.9.5. Isomerases.....	308
2.9.5.1. Synoptic view	308
2.9.5.2. Representatives.....	308
2.9.5.3. Specific interactions (selective).....	309
2.9.6. Ligases	309
2.9.6.1. Synoptic view	309
2.9.6.2. Representatives.....	311
2.9.6.3. Specific interactions (selective).....	312
2.10. Enzymes in food chemistry and in nutrition	313
2.10.1. Synoptic view.....	313
2.10.2. Enzymes in food chemistry.....	314
2.10.2.1. General aspects	314
2.10.2.2. Enzymes destined for food processing.....	314
2.10.2.3. Immobilized enzyme preparations	316
2.10.2.4. The contribution of molecular biology in food enzymology	319
2.10.3. Enzymes in human nutrition	320
2.10.3.1. Morpho-physiological bases of nutrition	320
2.10.3.2. Biochemical bases of nutrition.....	321
2.10.3.3. Enzymes of the digestive tract	321
2.10.3.3.1. Salivary enzymes	321
2.10.3.3.2. Enzymes from gastric juice	322
2.10.3.3.3. Pancreatic enzymes.....	323
2.10.3.3.4. Enzymes from intestinal juice	324
2.10.3.3.5. Role of bile in digestion and absorbtion.....	325

CONTENTS

2.10.3.3.6. Absorbtion of metabolites	327
2.11. Enzymes in recombinant DNA technology.....	327
2.11.1. Synoptic view.....	327
2.11.2. Particularities of genic recombination	328
2.11.3. Enzymatic operating means	330
2.12. Enzymes in clinical chemistry and pathobiochemistry	332
2.12.1. Synoptic view.....	332
2.12.2. The main enzymes in clinical chemistry and pathobiochemistry	333
2.12.2.1. Aminotransferases.....	333
2.12.2.2. Creatine phosphokinase	335
2.12.2.3. Lactate dehydrogenase.....	336
2.12.2.4. Phosphatases	336
2.12.2.5. -glutamyl transferase	338
2.12.2.6. Amylases	339
2.12.2.7. Cholinesterases	340
2.12.2.8. 5'-nucleosidase.....	342
2.12.2.9. Lipases	342
References (selective).....	344
PART II. BIOCHEMICAL MESSENGERS	349
3. ENDOACTIVE AND EXOACTIVE BIOCHEMICAL MESSENGERS.....	351
3.1. General considerations	351
3.2. Integrative specificity of the biochemical messengers	353
3.3. Characteristics of the biochemical messengers	353
3.4. Main types of biochemical messengers	354
3.4.1. Hormones	354
3.4.2. Neurotransmitters.....	354
3.4.3. Pheromones	355
3.5. Receptors of biochemical messengers	356
3.6. Signal molecules with connective metabolic attributes	358
3.6.1. Synoptic view	358
3.6.2. Hydrophilic signal molecules	359
3.6.3. Hydrophobic signal molecules	362
3.6.4. Other signal molecules	365
References (selective)	368
4. HORMONES	369
4.1. General considerations	369
4.2. Chemical composition and natural distribution	371
4.2.1. Synoptic view.....	371
4.2.2. Chemical composition of hormones	371
4.2.2.1. Protein hormones.....	372
4.2.2.2. Steroid hormones.....	373
4.2.3. Natural distribution.....	373
4.2.4. Role and characteristics	374
4.2.5. Antihormones.....	375
4.2.6. History – premises and evolutive status	375
4.2.7. General physiologic effects	381
4.3. Classification and nomenclature	382
4.3.1. Classification of hormones	382
4.3.2. Hormone precursors.....	382

4.3.3. Hormone nomenclature.....	383
4.4. Mechanisms of action of hormones	383
4.4.1. Biosynthesis, vehiculation and regulation	383
4.4.2. Hormonal receptors.....	384
4.4.2.1. Specificity of binding situs	384
4.4.2.2. Hormon – receptor interaction.....	385
4.4.2.3. Formation of the receptor-effector complex.....	386
4.4.3. Mechanisms of action of protein hormones.....	387
4.4.4. Mechanisms of action of steroid hormones	389
4.5. Hypothalamic–pituitary hormones	390
4.5.1. Synoptic view.....	390
4.5.2. Anatomical data	391
4.5.3. Specificity of pituitary hormones	391
4.5.4. Group of corticotropic hormones.....	393
4.5.4.1. Adrenocorticotropic hormone	395
4.5.4.1.1. Chemical structure	395
4.5.4.1.2. Biological activity	395
4.5.4.2. Melanocyte-stimulating hormone.....	393
4.5.4.2.1. Chemical structure	396
4.5.4.2.2. Biological activity	397
4.5.5. Group of somatomammotrop hormones	397
4.5.5.1. Somatotrop hormone	398
4.5.5.1.1. Chemical structure	398
4.5.5.1.2. Biological activity	398
4.5.5.2. Luteotrop hormone	398
4.5.5.2.1. Chemical structure	399
4.5.5.2.2. Biological activity	399
4.5.6. Group of neurotrop hormones.....	400
4.5.6.1. Vasopressine.....	400
4.5.6.1.1. Chemical structure	400
4.5.6.1.2. Biological activity	400
4.5.6.2. Oxytocin	401
4.5.6.2.1. Chemical structure	401
4.5.6.2.2. Biological activity	401
4.5.7. Group of glycoprotein hormones	402
4.5.7.1. Thyroid stimulating hormone	403
4.5.7.1.1. Chemical structure	403
4.5.7.1.2. Biological activity	403
4.5.7.2. Follicle stimulating hormone.....	404
4.5.7.2.1. Chemical structure	404
4.5.7.2.2. Biological activity	404
4.5.7.3. Luteinizing hormone.....	404
4.5.7.3.1. Chemical structure	404
4.5.7.3.2. Biological activity	405
4.5.8. Specificity of hypothalamic hormones	405
4.5.8.1. Liberins and statins	405
4.5.8.1.1. Hypothalamic liberins	406
4.5.8.1.2. Hypothalamic statins	407
4.5.8.2. Neurophysins	407
4.6. Epyphiseal hormone	409
4.6.1. Synoptic view.....	409
4.6.2. Anatomical data	409
4.6.3. Melatonin.....	410
4.6.3.1. Chemical structure.....	410

CONTENTS

4.6.3.2. Biological activity.....	410
4.6.4. Other derivatives of tryptophan	410
4.7. Thyroid hormones.....	411
4.7.1. Synoptic view.....	411
4.7.2. Anatomical data	412
4.7.3. Triiodothyronine and tetraiodothyronine.....	412
4.7.3.1. Chemical structure.....	413
4.7.3.2. Biological activity.....	413
4.8. Thyro-parathyroide hormones	415
4.8.1. Synoptic view.....	415
4.8.2. Anatomical data	416
4.8.3. Parathormone	416
4.8.3.1. Chemical structure	416
4.8.3.2. Biological activity.....	417
4.8.4. Calcitonin	419
4.8.4.1. Chemical structure.....	419
4.8.4.2. Biological activity.....	419
4.9. Pancreatic hormones.....	420
4.9.1. Synoptic view.....	420
4.9.2. Anatomical data	420
4.9.3. Insuline.....	421
4.9.3.1. Chemical structure	421
4.9.3.2. Biological activity.....	422
4.9.4. Glucagon.....	425
4.9.4.1. Chemical structure.....	425
4.9.4.2. Biological activity.....	426
4.10. Gonad hormones.....	427
4.10.1. Synoptic view	427
4.10.2. Anatomical data.....	428
4.10.2.1. Male gonads.....	428
4.10.2.2. Female gonads	428
4.10.3. Androgen hormones.....	430
4.10.3.1. Chemical structure.....	430
4.10.3.2. Biological activity	431
4.10.4. Estrogen hormones.....	431
4.10.4.1. Chemical structure	432
4.10.4.2. Biological activity	432
4.10.5. Progestogen hormone.....	433
4.10.5.1. Chemical structure	433
4.10.5.2. Biological activity	433
4.11. Adrenal hormones	434
4.11.1. Synoptic view.....	434
4.11.2. Anatomical data	434
4.11.3. Adrenal medullary hormones.....	435
4.11.3.1. Chemical structure	435
4.11.3.2. Biological activity	435
4.11.4. Adrenocortical hormones.....	438
4.11.4.1. Mineralcorticoids	438
4.11.4.1.1. Chemical structure	438
4.11.4.1.2. Biological activity	438
4.11.4.2. Glucocorticoids	439
4.11.4.2.1. Chemical structure	439
4.11.4.2.2. Biological activity	440
4.11.4.3. Sex steroids	441

4.11.4.3.1. Chemical structure	441
4.11.4.3.2. Biological activity	441
4.12. Hormones with circumstantial attributes	441
4.12.1. Synoptic view	441
4.12.2. Thymopoietin	442
4.12.2.1. Anatomical data	442
4.12.2.2. Chemical structure	442
4.12.2.3. Biological activity	443
4.12.3. Chorionic gonadotropin hormone	443
4.12.3.1. Chemical structure	443
4.12.3.2. Biological activity	443
4.12.4. Relaxin	443
4.12.4.1. Chemical structure	443
4.12.4.2. Biological activity	444
4.13. Tissue hormones	444
4.13.1. Synoptic view	444
4.13.2. Gastrointestinal hormones	444
4.13.2.1. Gastrin	445
4.13.2.1.1. Chemical structure	445
4.13.2.1.2. Biological activity	445
4.13.2.2. Secretin	446
4.13.2.2.1. Chemical structure	446
4.13.2.2.2. Biological activity	447
4.13.2.3. Cholecystokinin - pancreozymin	448
4.13.2.3.1. Chemical structure	449
4.13.2.3.2. Biological activity	449
4.13.2.4. Motilin	450
4.13.2.4.1. Chemical structure	450
4.13.2.4.2. Biological activity	450
4.13.2.5. Other peptide hormones	450
4.13.2.6. Non-hormone substances in the gastro-intestinal tract	451
4.13.3. Liver tissue hormones	451
4.13.3.1. Angiotensin	451
4.13.3.1.1. Chemical structure	451
4.13.3.1.2. Biological activity	451
4.13.3.2. Kinin	453
4.13.3.2.1. Chemical structure	453
4.13.3.2.2. Biological activity	453
4.13.4. Renal tissue hormone	454
4.13.4.1. Erythropoietin	454
4.13.4.1.1. Chemical structure	454
4.13.4.1.2. Biological activity	454
4.13.5. Heart tissue hormone	455
4.13.5.1. Natriuretic atrial peptide	455
4.13.5.1.1. Chemical structure	455
4.13.5.1.2. Biological activity	455
4.13.6. Adipose tissue hormones	456
4.13.6.1. Adiponectin	453
4.13.6.1.1. Chemical structure	456
4.13.6.1.2. Biological activity	456
4.13.6.2. Leptin	457
4.13.6.2.1. Chemical structure	457
4.13.6.2.2. Biological activity	457
4.14. Hormones and eating behavior	457

CONTENTS

4.14.1. Synoptic view	457
4.14.2. Hormones action	458
4.15. Hormones in clinical chemistry and pathobiochemistry	459
4.15.1. Synoptic view	459
4.15.2. Identification and dosage	459
4.15.3. Autoregulation in the endocrine system	459
4.15.4. Implications of biochemical dyshomeostasis.....	462
